Mercedes-AMG C63

Night, canopy light

BMW M3

Night meet

PROFILE

Automotive photographer based in Katy and owner of Space City Frames. I shoot exteriors, interiors and details that show a car the way a buyer sees it in person: accurate paint, sharp badges and wheels, and edits that never look overdone. Ten years in management and supervisory roles taught me to hold one standard at volume, and I run every shoot that way, from planning and light to editing and delivery.

EXPERIENCE

Space City Frames

Owner & Photographer · 2026 – Present · Katy, TX

- Photograph everything from daily drivers to exotics: Mercedes-AMG, BMW M, Lamborghini, Ferrari and Porsche.
- Shoot complete walkaround sets (front and rear three-quarters, profile, wheels, badges) so every frame reads as the same car.
- Edit in Lightroom and Photoshop for clean light and true-to-life color, so the paint on screen matches the paint on the lot.
- Work in any light: golden hour, daylight, gas station canopies and night meets.
- Handle client communication, scheduling, invoicing and delivery of final galleries.
- Built and maintain spacecityframes.com, including an automotive portfolio of 40+ vehicles sorted by full sets, daylight, golden hour, night, details and motion.

WHAT I SHOOT

Exterior walkarounds
Interior and cabin details
Wheels, brakes and badges
Golden hour, daylight and night
4K 60fps video clips

EDIT & DELIVER

Lightroom and Photoshop
True-to-life paint color
Web-ready exports for listings and social
Gallery and website management
Client communication
